

# Workshops for Weston Creek Y3 – Year 6

1

Monday 21 January to Wednesday 23 January

## Robotics 3 Day Camp

Whether you are a newbie to robotics or experienced and want to build on your existing skills, this robotics boot camp is for you. Over three days you will stretch your robotics muscles building your skill strength until you become a Robotics Master.

This is a three day program that will use LEGO WeDo (™) kits to build models featuring working motors and sensors. Learn to program these models using WeDo (™) software, which is an intuitive, easy to use software medium whilst participating in fun design challenges.

This is a hands on learning course that will encourage creative thinking and problem solving. Join us for Robotics Bootcamp NOW!

Please note that this is a three day program. Participants need to attend all three day, single day enrolment is not possible.
