

Workshops for Year Three Campbell

1

Monday 15 April

Adventure Time...Trapping

Traditionally, traps have been used by humans for thousands of years in order to trap animals for food, clothing and utensils. In our modern era traps are now used by scientists to trap animals for research, conservation and environmental protection – most of which are returned, harm-free back into their natural environments. This extraordinary workshop looks at trapping over the centuries and explores the engineering required to build effective traps suitable for their purpose.

Tuesday 16 April

Adventure Time...Capture the Flag

Ever wondered how much organisation and planning went into battle all those years ago? How do you think you would fare as a leader of an army? Today we learn about the rules and protocols of ancient armies, including how some of the most famous battles were won, all thanks to the smarts of a single leader... Then we test our knowledge in a game of Capture the Flag where two opposing teams must, using pure cunning, capture the flag from enemy territory before their own flag is stolen!

Wednesday 17 April

Act Up!...Theatre Sports

Get ready to think on your feet and deliver hilarious theatre sport moments. This workshop teaches students Theatre Sports and all the skills required for seamless improvisation. Students will work in small groups to master this very exciting but nerve-racking set of games. A Swish workshop designed for students who enjoy drama, public speaking and/or communication.

Thursday 18 April

CSI – Crime Swish Investigation...Whose Clues?

Whose clues? My clues! Every person is a walking clue. If you walk into a room, there is good chance that you left behind evidence of yourself. From footprints to fingerprints and from hair to DNA, you are leaving your clues everywhere. Through forensic investigation you will discover how to collect these clues and then how to analyse them in order to uncover the original host, or should I say 'suspect'...?

Monday 22 April

Closed – Public Holiday

Tuesday 23 April

Digging Archaeology...Stonehenge

Stonehenge is an archaeologist's dream! It is full of mysteries and interesting stories and today you will be trying to uncover its many hidden secrets. How was it built and by who? What does it do? What does it mean? And what about the mysterious skeleton buried there? Be prepared to uncover some interesting artefacts and to learn some insider's tricks to unearthing long-lost treasures.

Wednesday 24 April

Get into Gear...You're an Engineer... We All Live in a Yellow Submarine

It's time to steady your heart and prepare yourself to be immersed in the underwater world of submarines. You will explore the ocean floors, peer through a periscope, salute the captain and explore the vast underwater world that surrounds our shores. Along the way you will build your own mini-submarine and learn about some the technologies that enable submarines to submerge, and then luckily to re-emerge.

Thursday 25 April

Closed – Public Holiday

Friday 26 April

Get into Gear, You're an Engineer... Have fun with Robots

The We Do and Sphero come out for this fun day using our robotics kits. Try new skills, explore what the different robots can do and use easy drag drop software to code the robots. Whether you have used these before or are new to We Do and Sphero there will be plenty for you to do as we have fun with robots. You will even get to make your own basic robot to take home.
