

Workshops for Year Four & Up Campbell

Monday 15 April

The Real Surreal Deal

Melting clocks? Clouds in your eyes? Toes that grow roots? Floating houses? Cars full of turnips? Elephants with trumpets? Be prepared to discover, not the world of the unreal but rather the world of Surreal. This exhilarating workshop uncovers the history, artists and art works of the Surrealist period. You will not only delve into this world but also create and take home your very own mini-surreal masterpiece. Book now, don't 'Dali' because you might miss out...?

Tuesday 16 April

What Planet are you on?

Imagine we are all from one of four different 'planets' – blue – green- red or yellow and what this might mean in the way we interact with those from other planets. On each of these four 'planets' we will meet a different type of person, although it is important to realise that all 'planets' are created equal, so no 'planet' is superior to any other. So – what planet are you on? And what might this mean for your life right now – your friendships- your studies - and how well you get on with others? Join us for this thought provoking workshop as we ask 'what planet are you on?'

Wednesday 17 April

Bitmonkeys...I'm a Podcaster

Learn the skills required to turn your radio aspirations into a radio pod cast. Once you have researched, scripted and developed your own podcast, you will learn how to apply 'soundscapes', record you voice, add songs and insert interviews in order to record your program using audio production programs.

Thursday 18 April

Hydraulic Machines

Are you ready for the challenge? Come along as we challenge you to make your own hydraulic machines. There will be something for the engineer in all of you in this workshop. Curious? You should be, this one will be amazing! No one will go home empty handed or disappointed.

Workshops for Year Four & Up Campbell

Friday 19 April

Closed – Public Holiday

Monday 22 April

Closed – Public Holiday

Tuesday 23 April

The Great Race

Seven locations, five teams, 15 tasks and lots of problem solving. Participants will undertake several tasks to determine the winning team of the Great Race SWISH. The Great Race is about accuracy, NOT speed and requires careful planning and execution to win the task. Participants will need to wear covered footwear and comfortable clothing..

Wednesday 24 April

Game On

Create a world where you can mine resources, code your character, beat your opponents and capture the prize! Join us as we make a board, build models, set rules, problem solve, play games and most importantly, have fun..

Thursday 25 April

Closed – Public Holiday

Friday 26 April

Scratch That and Code it

Coding is everywhere and for everyone. This workshop shows you how to use Scratch, a graphics style programming language that uses drag and combine code blocks to create programs.
